Commitment to achieving Net Zero

T3 Security Limited is committed to achieving Net Zero emissions by 2027.

Baseline/Current Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021

Additional Details relating to the Baseline Emissions calculations

Our Carbon Emissions in 2021 were measured in line with GHG Protocol and include the greenhouse gases stated in the Kyoto Protocol. In order to manage and streamline our supply chain, we have ensured that upstream and downstream transportation and distribution emissions are measured year on year and included in our scope 3. We have also measured our Business Travel and Employee Commuting as part of our Scope 3 emissions. The Government issued emissions factors have been used to calculate the CO2e for each source.

10.69 (tC02e) Scope 3 Indirect Other

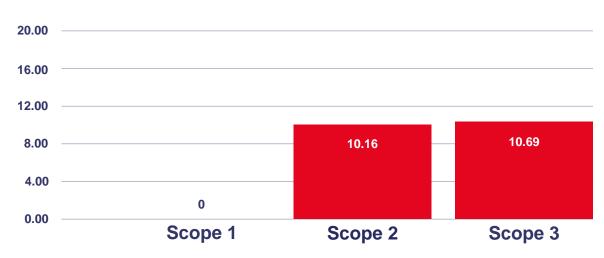

Total Emissions 20.85 tC02e

Scope 3 Breakdown

Scope 3	Total	10.69
Waste generated in operations		0.00
Upstream transportation and distribution		0.00
Downstream transportation and distribution		0.00
Business travel		2.0325
Commuting		8.6620

As 2021 is our baseline year, we have been able to identify areas of reporting that need to be improved for our 2022 report.

We are looking to fit all vehicles in our fleet with tracking software, to ensure emissions from this source are reported year on year. Additionally, we will be changing to a fully electric fleet by 2027, with electric charging points installed in the office car park and electricity provided from a renewable source.

Baseline Year 2021

We are looking to actively reduce our emissions by:

- Changing office lights to LED light fittings throughout the building, maximising natural light as well as installing motion sensors that will switch lights off when not in use.
- Promote waste recycling by encouraging employees to recycle. Bins have been around the office with instructions on how to sort waste. We also provide training twice a year for staff to ensure we promote an environmentally aware culture.
- Avoid wasting paper- T3 employees are encouraged to think before they print and the print option is set to double sided to reduce the amount of paper used.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
